14 February 1963

MEMORANDUM FOR: Chief, Technical Intelligence Division

SUBJECT: Instructions Concerning the Movement of Materials to
25X1A [REDACTED]

25X1A

1. Meeting was held at Headquarters on 13 February 1963 concerning the contract with [REDACTED] on the reduction of data from stellar exposures. Persons present were:

25X1A

[REDACTED]

2. The decisions made were as follows:

25X1A

a. [REDACTED] stated that we could move the required materials to [REDACTED]

25X1A

b. [REDACTED] stated that we could commence at our convenience.

25X1A

25X1A

3. Instructions concurred by security personnel were as follows:

a. NPIC to use its own courier service to transport materials to [REDACTED]

25X1A

b. [REDACTED] is to forward original negatives of stellar exposures sans any classification whatsoever, furthermore original negative is to be delivered to [REDACTED] address. The movement of the original negative should be coordinated with [REDACTED] after completing stellar data reduction to forward original negative to NPIC using NPIC couriers, where a classification leader can be attached.

25X1A

25X1A

25X1A

c. [REDACTED] to continue sending copies of original negative to users as he has in the past, however, any copies that [REDACTED] distributes must have classification leader attached (which is SOP).

SECRET

d. Materials presently at NPIC, (Mission 9050) to be forwarded with NPIC courier at our convenience. This includes the following:

- (1) Ephemeris (Best Guess) (reference to mission to be eliminated).
- (2) Original negative (sterilized).
- (3) G. C. T. of each stellar exposure.
- (4) Stellar camera data i.e. position of principal point, operational focal length, knee lock angle, and exposure time.

25X1A

25X1A

4. It is recommended that next week [REDACTED] accompany these materials so that he can explain the significant details to [REDACTED]
